

Problem Statement

As UCP students, we waste ₹8,000+ per semester on expensive external services, while our skilled peers struggle to monetize their talents. There's no trusted platform connecting students who **need affordable help** with those who **can provide it** - creating a broken campus economy where talent goes unused and money leaves our campus.

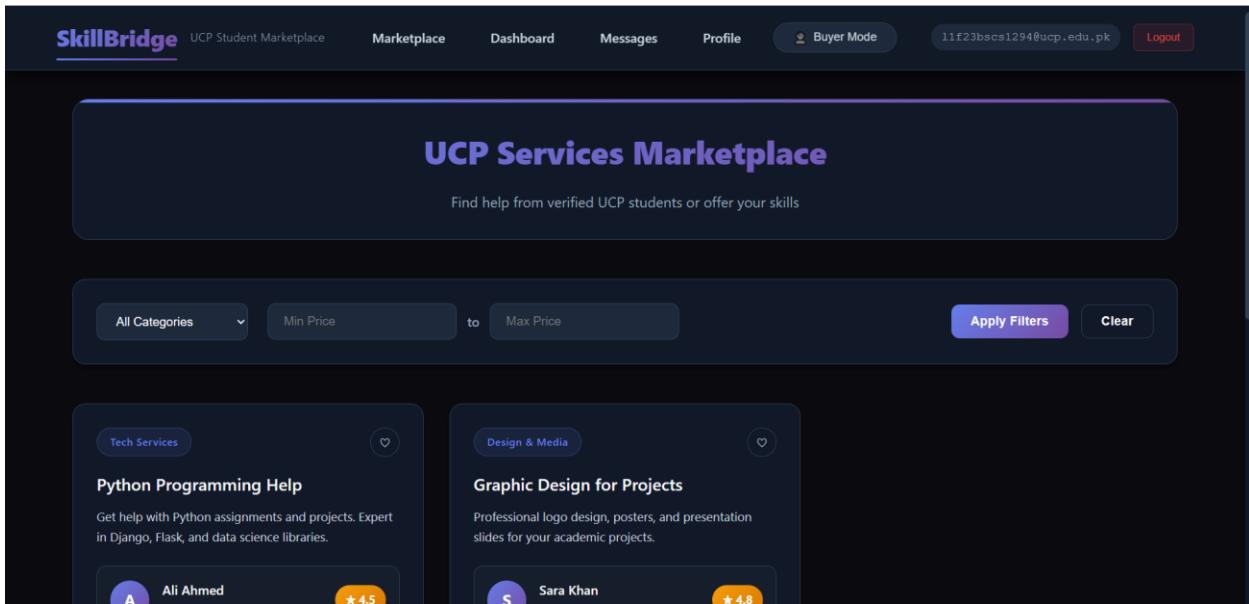

Solution Statement

SkillBridge is UCP's exclusive marketplace where students safely hire and get hired by verified peers. We built a **trust-first platform** with UCP email verification, clear payment tracking (25% advance, 75% on completion), and a rating system - creating a circular campus economy that keeps money and opportunities within UCP.

The screenshot shows the SkillBridge Marketplace homepage. At the top, there's a navigation bar with the SkillBridge logo, user information (11f23bscs1294@ucp.edu.pk), and a Logout button. Below the navigation is a large dark blue call-to-action button with 'Browse Services' and 'Get Started' buttons. The main content area has three columns: 'SkillBridge' (with UCP Student Marketplace and Connecting talent with opportunity), 'Quick Links' (Marketplace, Dashboard, About, Contact), and 'Contact' (University of Central Punjab, Lahore; Email: support@skillbridge.ucp.edu.pk). At the bottom, a copyright notice reads: © 2024 SkillBridge - UCP Hackathon Project. All rights reserved.

This screenshot shows the 'UCP Services Marketplace' section of the website. It features a header with the SkillBridge logo, user info, and a 'Buyer Mode' button. Below the header is a large purple-bordered box containing the title 'UCP Services Marketplace' and the subtext 'Find help from verified UCP students or offer your skills'. Underneath this is a search/filter bar with dropdowns for 'All Categories', 'Min Price', 'Max Price', and buttons for 'Apply Filters' and 'Clear'. Two service cards are displayed: 'Python Programming Help' offered by 'Ali Ahmed' with a 4.5 rating, and 'Graphic Design for Projects' offered by 'Sara Khan' with a 4.8 rating. Each card includes a category badge (Tech Services, Design & Media) and a heart icon.

[Tech Services](#)**Python Programming Help**

Get help with Python assignments and projects. Expert in Django, Flask, and data science libraries.

**Ali Ahmed**
